

## **Final Year Project Proposal**

Student Number and Name of Student:

(A176818) Kok Yao Zhang

### **Program**

Bachelor of Information Technology with Honours

### **Supervisor**

Assoc. Prof. Dr. Ravie Chandren Muniyandi

### **Project proposal title**

Parental control mobile application

### **Description**

Childrens are particularly vulnerable to accidents. Many parents needs a monitoring application to tell where their child is physically, or alert them if the child is somewhere he or she shouldn't be. This parental control mobile application will help parents to regain insight about their children. It will be able to monitor and tracks the child and their activities from anywhere, display their location history and sends all the data from the child's phone to to the parent's phone when sos button trigger manually.
